

Early Fall Walkabout

As you walk around your neighborhood, keep your eyes out for these things.

As it gets cooler in the Fall, what do you need to wear for clothes on a walk in your neighborhood?

The leaves are beginning to change colors already. Can you spot red, yellow, green, brown, and orange leaves? How many did different colors did you find?

Fall decorations are beginning to appear in people's yards. How many pumpkins can you spot on your walk?

Squirrels are beginning to store food for the winter. They enjoy acorns and pinecones. Can you spot a squirrel? Try to find an acorn or a pinecone.

As you pass the houses and mailboxes beside the road, find one that has the number of your age on it.

A few flowers are in bloom. Some of your neighbors may have fall mums in front of their houses. Find a flower.

Run between two mailboxes with your parent's permission. Have them tell you, "Ready, set, go!" Be sure to stop where they tell you to stop.

Fall is the time apples are ready to harvest. See if you can spot any apples on the ground in your neighborhood. What is your favorite way to eat apples?
